

Acquiring a Liquor License

You need a Class C Liquor License if your customers are to consume beer, wine, and spirits at your new bar or restaurant.

You can apply for a liquor license through the Michigan Liquor Control Commission. To grant your request, there are several things you should know.

1. You must have a pre-determined location for your bar or restaurant;
2. The license for your bar or restaurant must not exceed the quota for Class C Liquor Licenses that are already active in your chosen county or municipality.
3. The Michigan Liquor Control Commission has a finite number of licenses it awards throughout the State of Michigan. Each county and/or municipality has a subset of those licenses. The greater the population, the more licenses that can be operational within the geographic boundary.
4. Our organization already has an available license for the City of Jackson. We also have a location for this license. Both are available for sale to an interested and qualified buyer.
